一、产品概述 General

FJ6/JTS2系列多用途接线端子系专为各类电控配电设备，成套装置及组合式终端电器箱中配线而设计。产品的额定绝缘电压690V，额定工作电压380V，进线端连接导线的最大截面为120mm²，出线端按连接回路数的多少以及接线方式的不同，分别可连接导线的截面为2.5-120mm²。该产品结构新颖独特；接线牢固可靠；使用灵活方便。可作各类电气装置中母线排、大电流端子、接零、接地端子、等电位端子之用。

FJ6/JTS2 series terminal block is designed for wiring in electric control distribution equipment, complete equipment and terminal apparatus, etc.. The product is of rated insulation voltage 690V, rated working voltage 380V, max section of inlet terminal conductor 120mm². According to different circuit number and connection ways, the section of outlet terminal reaches 2.5-120mm². This product structure has advantages of original structure, firm connection and flexible operation. In addition, it can also serve as electric equipment busbar, heavy-current terminal block, neutral terminal, grounding terminal, equipotential terminal, etc..

二、结构特点 Structural features

FJ6/JTS2多用途端子由导电件、绝缘座和防护罩组成，体积小，结构可靠，其进线端既可以将导线直接接入(筒式连接)、也可用OT端头(线鼻子)连接(板式连接)，亦可接入宽度≤30mm的铜排，其出线端则统一为筒式连接。压线螺钉的底部为特制的球形压线时不仅不伤导线，而求uudui导线具有足够大的挤压力，接触更可靠。

FJ6/JTS2 series terminal block is composed of conductive part, insulator foot and protective cover, with compact volume and reliable structure. Through its inlet terminal, the conductor can be connected directly (simple connection), or connected with OT lug (panel connection), in addition, this inlet terminal also allows the copper busbar not exceeding 30mm to enter, and all connections at the outlet terminal are of the barrel type. The bottom of crimping screw is spherical shape, which takes no damage over the conductor when crimping, and even brings big enough extrusion force over the conductor and have more reliable contact.

三、安装与使用 Installation & Use

本系列产品提供了两种安装方式：1、直接在底板上打孔安装(仅限外形尺寸为78×63×36，安装螺钉为M5)；2、安装在TH-35导轨(顶帽轨)上。接入导线建议使用多芯线，导线插入盲孔时要确认插到底后方能往下拧螺钉，以防误接。当接入导线截面较小，且导线绝缘能塞进接线孔时，在确保导体接触可靠的前提下，允许绝缘进入接线孔。当使用时或线路进行维护需要打开防护罩时，只需在防护罩的搭勾处向内用手轻捏便可取下，亦可用螺丝刀从搭勾处插入，轻轻旋转即可取下。装防护罩时要在四个搭勾处向下施压，确保每个搭勾全部卡在孔内方可。

There are two ways to install this product: 1. Drill a hole in the bottom plate directly and install (only for the product whose outline size is 78×63×36, and mounting screw is M5); 2. Install it on TH-35 rail (top-hat rail). It is suggested that multi-core wire should be used for connecting conductors. And only the conductor is inserted into the bottom of blind hole thoroughly, could the screw be tightened down to prevent wrong connection. When conductor section is small, and conductor insulator can be stuffed into the connection hole, the insulator is allowed to enter into the connection hole on the premise of reliable contact of conductor. If the protective cover is required to open, pinch the lap of protective cover inward slightly, inset a screwdriver into the lap, then rotate it slightly. When to assemble the protective cover, apply the pressure to four laps, and make sure every lap into the hole.

一、产品概述 General

FJ6S系列多用途接线端子专为各类电控配电设备、成套装置、多回路电表箱及组合式终端电器箱中配线而设计。产品的额定绝缘电压690V，额定工作电压380V，最大额定工作电流为630A。进线端可连接导线截面为6mm²~185mm²出线端按连接回路数的多少以及接线方式的不同分别可连接导线的截面2.5mm²~185mm²。该产品结构新颖独特，接线牢固可靠，使用灵活方便。是各类电气装置中母线排(汇流排)，接地端子、零线端子排理想的替代产品。

FJ6S series terminal block (elaborate type) is specially designed for wiring in various electric control distribution equipment, complete sets, multi-circuit meter boxes and combined type terminal unit boxes. Its rated insulation voltage is 690V, rated operating voltage 380V, max rated operating current 630A. The inlet end can be connected with conductors of 6mm²~185mm² in sectional area, the outlet end 2.5mm²~185mm² in sectional area according to the circuit number and wiring mode. The product possesses advantages of novel structure reliable wiring convenient operation.

二、产品特点 Features

FJ6S系列多用途接线端子由导电体，绝缘座和防护罩组成，整体采用积木式接装组成，构思精巧，外形美观，结构可靠。其进线端既可以将导线直接接入(筒式安装)、也可用OT端子(线鼻子)引出进行板式连接。压线螺钉为高强度的紧定螺钉，底部为特制的球形，压线时对导线无损伤，而且对导线具有足够大的挤压力，接触更可靠。

FJ6S series terminal block is made up of electric conductor bench insulator and protective cover. The integrated body adopts building block system assembly mode, with elaborate construction elegant appearance and reliable structure. The inlet end can be connected with the conductor directly (simple installation) or outlet by OT terminal (line lug) and connected in plate wiring way. We adopt high strength set screw as press line screw, and use special spherical bottom, which guarantees enough pressure to the press line without damaging it and makes sure that there is a reliable touch.

三、安装与使用 Installation and operation

本系列产品提供了两种安装方式：1、固定式直接在底板上打孔安装，安装螺钉为M5；2、卡轨式安装在TH-35导轨(顶帽轨)上。接入导线建议使用多芯线，导线插入盲孔时要确认插到底后方能往下拧螺钉，以防误接。当接入导线截面较小，且导线绝缘能塞进接线孔时，在确保导体接触可靠的前提下，允许绝缘进入接线孔。当使用时或线路进行维护需要打开防护罩时，只需在防护罩的搭钩处向内用手轻捏便可取下，亦可用螺丝刀搭钩处插入，轻轻旋转即可取下。

This series of products provides two types of installation mode: 1. Fixed type, drill hole on the bottom plate and install directly. Mounting screw is M5; 2. Rail type mounting, install on TH-35 rail. We suggest using multi-core line as inlet wire, when inserting the conductor to blind hole, make sure that the conductor should be fully inserted that you can screw down the bolt, otherwise, you may make a wrong connection. When the sectional area of inlet wire is rather small but the wire insulation part can be squeezed into the connection hole, on the premise of reliable touch of conductor the insulation part is allowed to entry the connection hole. When wanting to open the protective cover for operating or maintaining, just pinch the latching part of protective cover by hand to take off the cover, or insert into the lapping part by screw driver and rotate lightly to take off the cover.

四、订货须知 Notification of order

一、产品概述 General

FJ6SF系列多用途封闭式防窃电接线端子专为各类电控配电设备、成套装置、多回路电表箱及组合式终端电器箱中配电线而设计。产品的额定绝缘电压690V，额定工作电压380V，最大额定工作电流为630A。进线端可连接导线截面为6mm²~185mm²出线端按连接回路数的多少以及接线方式的不同分别可连接导线的截面2.5mm²~185mm²。该产品结构新颖独特，接线牢固可靠，使用灵活方便。是各类电气装置中母线排(汇流排)，接地端子、零线端子排理想的替代产品。

FJ6SF Setries terminal block (anti-electricity-theft) is specially designed for wire layouts in various electric control distribution equipment, complete sets, multi-circuit meter boxes a and combined type terminal unit boxes. Its rated insulation voltage is 69V rated operating voltage id 380V, maxrated operating current is 630A. The inlet end can be connected with conductors of 6mm²~185mm² in sectional area, the outlet end can be connected with conductors of 2.5mm²~185mm² in sectional area according to the circuit number and wiring mode.The product possesses advantages of novel structure, reliable wiring, convenient operation, it really is the ideal successor of bus bar, earth terminal and zero line terminal block.

二、产品特点 Features

FJ6SF 系列多用途封闭式防窃电接线端子由导电体，且有封闭式绝缘座和防护罩组成，带有防盗窃左右、右铅封装置，安装方便、构思精巧、外形美观、结构可靠。压线螺钉为高强度的紧定螺钉，底部为特制的球形，压线时对导线无损伤，而且对导线具有足够大的挤压力，接触更可靠。

FJ6SF series multi-purpose anti-electricity-theft connection terminal is made up of electric conductor enclosed type bench insulator and protective cover, with right and left anti-thert lead seal device, it is convenient in installation, and has exquislte structure, elegant appearance and rrellable construction. We adopt high strength set screw as press line screw, and use special spherical bottom, which guarantees enough pressure to the press line without damaging it, and makes sure that there is a reliable touch.

三、安装与使用 Installation and operation

本系列产品提供了两种安装方式：1、固定式直接在底板上打孔安装，安装螺钉为M5；2、卡轨式安装在TH-35导轨(顶帽轨)上。接入导线建议使用多芯线，导线插入育孔时要确认插到底后方能往下拧螺钉，以防误接。当接入导线截面较小，且导线绝缘能塞进接线孔时，在确保导体接触可靠的前提下，允许绝缘进入接线孔。当使用时或线路进行维护需要打开防护罩时，只需在防护罩的搭勾处向内用手轻捏便可取下，亦可用螺丝刀搭勾处插入，轻轻旋转即可取下。

This series of products provides two types of installation mode:1 Fixed type, drill hole on the bottom plate and install directly, mounting screw is M5; 2.Rail type mounting, install on TH-35rail We suggest using multi-core line as inlet wire, when inserting the conductor to blind hole, make sure that the conductor should be fully inserted that you can screw down the bolt, otherwise, you may make a wrong connetion.When the sectional area od inlet wire is rather small but the wire insulation part can be squeezed into the connection hole, on the premise of reliable touch of condutctor the insulation part is allowed to entry the connection hole. When wanting to open the protective cover for operating or maintaining, just pinch the laooing part of protective cover by hand to take off the cover, or insert into the lapping part by screw driver and rotate lightly to take off the cover.

四、订货须知 Nitification of order

订货时请注明型号(或订货号)和数量即可。FJ6SF 系列多用途端子，可定制非标各种进线和出线平方线数。When placing an order, please indicate the model(or order No.)and quantity clearly. FJ6SF series multi-purpose terminal can be customized with various non-standard inlet and outlet wire square number.

一、性能与特点 Function & Features

- FJ6/HDJ系列穿刺线夹主要适用于架空绝缘导线的接续、分支连接和接地保护，适用电压等级为10KV和1KV及以下，其主要性能和特点：
- 安装简便。安装时无需剥去导线的绝缘层，只要按规定位置在线夹中放入主线和支线，用套筒扳手均匀拧断力矩螺母即可；
 - 接触电阻小，线夹温升低。特制力矩螺栓确保恒定的穿刺压力，使线夹与导线达到良好的电气接触而不过分损伤导线，保证架空绝缘导线的正常使用寿命；
 - 结构密封、绝缘性高。线夹内部采用绝缘导热油脂填充，安装后整个导体形成全封闭结构提高了绝缘强度和安全性；
 - 线夹适用范围广。可适用于铜铝绝缘导线、异径导线的支接、等径导线的对接。并适用于铜铝绝缘导线的过渡连接。

FJ6/HDJ series insulation piercing connector is mainly used for wire branching The applicable voltage is 10kV, 1kV, and less more than 1kV. It has the following function and features:

- Simple installation. The insulated layer of lead needn't be stripped. Put the mainline and branch line into connector correctly and screw the moent nut off with a box spanner.
- Small contact resistance and low temperature rising. The specially-made moment bolt guarantees constant piercing pressure which enable the connector to get a good electric contact without any excessive conductor damage and guarante the normal performance life of circuitry.
- Sealed sturture and high surability. The internal adopts whole sealing structure and is filled with insulating heat conducting grease, which improves insulating strength and security.
- Wide application range. It is applicable to branch connection of copper and aluminum conductor, hetero-dia metric conductotr, and butt joint of isodiametric conductor It is also applicable to transition branch connection of copper and aluminum insulated lead.

注：

1. 使用穿刺线夹的导线必须符合国家标准；
2. 穿刺线夹的安装人员必须完全熟悉安装技术；
3. 在带电作业时，请戴上绝缘手套铜扳手；
4. 穿刺线夹属一次性线夹，由于牙型变形拆卸后请勿重复使用。

Remarks

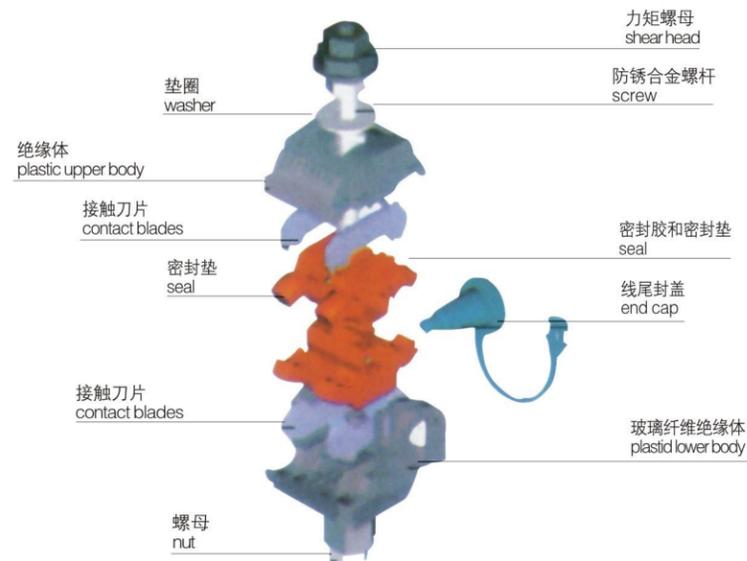

1. The conductor used for insulation piercing connector must conform with international standard.
2. The installation operator must be familiar with installation technique.
3. Please put on insulating gloves and use insulating box spanner during hot-line work.
4. The insulation piercing connector is a kind of one-time product. Please do not use it again after dismantling because of dental pattern transfiguration.

二、应用 Application

A: 高层楼宇竖井电缆分支

1. 用传统方法安装并固定好主干干线电缆
2. 在需做分支的部位剥开主缆护套0.6米(切勿破坏相线绝缘层)
3. 选与电表箱间距相符的分支电缆(不超过3米)并剥离两端端护套
4. 纵向依次安装分支器(分支器间距≥10cm)

1. Installing and fixing main cable in traditional way.
2. Stripping outer insulator of main cable fot 0.6m at part that need part (don't destroy insulator layer for phase).
3. Choosing brabch cable (not more than 3m) whose distance is the sane as electric meter box, and strip insulator at two terminals.
4. Installing the sepatror vertically by turns (the sepatator distance is more than 10cm).

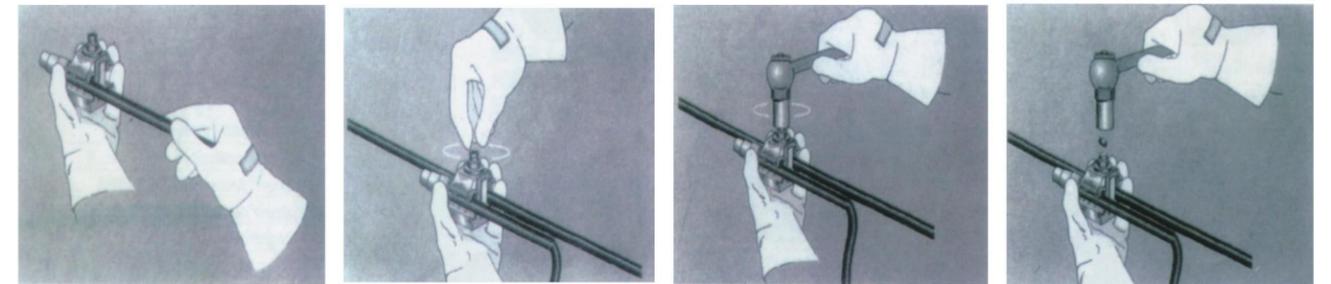

三、典型应用 Mainly application

- 路灯系统专用(竖井禁用)
- 建筑照明、路灯、高层竖井线连接
- 高层建筑竖井电缆户外架空线、电缆沟工厂动力供电主缆
- Special foreet lamp system (vertical shaft forbidden)
- For connecting the building lighrs, street lamp, high builing vertical shaft
- For connecting the cables of high building vertical shaft, outdoors overad wire, cable trench, factory power cable.

四、安装过程(单相线) Mounting process(single pjadse ling) 用扳手或开口扳手(禁止使用手工钳)

1. 将断面整齐的支线插入分支器盖套
Insert branch line into the casing cover of cinnector
2. 将分支器固定于主干线连接处，然后用力拧紧力矩螺母
Fix clamp on the joint of main line, then twist firmly by hand.
3. 用六角套铜板手垂直拧紧力矩螺母至螺帽断开为止
Vertically twist momenr screw to break screw cap with hexagonal set spanner.
4. 用六角套铜板手垂直拧紧力矩螺母至螺帽断开为止
Vertically twist momenr screw to break screw cap with hexagonal set spanner.

五、安装剖面图析 Mounting digram instuttion

涂有防氧化硅胶的接触刀片
导线截面越大接触齿越多
The bigger conductor section,
the more contacting teeth that
is for the contact blade coating
